

# Storage Solutions for the Fishing Enthusiast

# A Message from the President

Here at Organized Fishing we're excited to provide you with our latest catalog. We started Organized Fishing with one goal in mind, and that was to develop the finest assortment available of storage and organizational products for the fishing enthusiast.

To that end we offer this new catalog, which features a variety of improvements in our current assortment, along with numerous innovative new products. We strive to constantly look for new ideas, and we believe this new line up represents a tremendous step forward for Organized Fishing. This latest offering combines a blend of materials, designs, and functionality to solve a number of organizational challenges that come along with too much fishing gear.

In conjunction with new products come additional challenges, and this year we have seen a number of significant changes at Organized Fishing. First of all we feel very fortunate to have aligned ourselves with a single manufacturing facility in China. This has enabled us to improve our turns, as well as increased efficiencies in product development.

With all the new products it became essential to add warehouse space, so we almost tripled our facility in Burlington, Iowa. We significantly upgraded our packaging and support materials, and continue to look for ways to improve in this area. Lastly we added several people and look forward to their continued contributions.

It's been a busy year, with a long ways to go, but we're excited and ready for the challenge. We hope that as you view this catalog, you find the products as compelling as we do and if there is something we're missing or can improve, let us know!

Sincerely,  
John D. Friday  
President  
Organized Fishing
